1:00-3:00pm: Counseling Boys, Counseling Girls – A Difference

School counselors' techniques meet individual differences. Counselors can be more effective by being aware of the difference between boys' and girls' needs and reactions in a counseling setting. The reactions of boys vs. girls to: directions, conflict, discipline, and emotions will be presented. This presentation will include discussion of methods which benefit boys, and which benefit girls. Activities and sharing will be included.

3:00-4:00pm: Supervision of Practicum Students

School counselors are very generous about giving back to the profession by accepting a practicum student. Planning the details of working with a practicum student can make this experience a benefit to the student as well as the counselor. Providing details, an outline of expectations and methods for giving feedback will be included in this session.
